Culling the Masses is a book of impressive analytical and empirical scope. It consists of truly comparative cross-national research and analysis, examining immigration politics and policy in no fewer than six countries in the Americas: Argentina, Brazil, Canada, Cuba, Mexico, and the United States. It asks important questions about the troubling relationship between racism and democracy. Specifically, it addresses two significant puzzles: why did immigration policy come under the spell of eugenics in the first decades of the

twentieth century?and how did an anti-racist turn emerge in later decades, first in the weaker and more authoritarian nations of the Americas before finding its way to the stronger and more liberal-democratic regimes, Canada and the United States? A must read for anyone interested in race, immigration, and democratization. (Daniel J. Tichenor, University of Oregon)

The first book to offer a truly hemispheric and historical perspective on immigration policy. It also offers a high level of analytical integration. It is impressively and delightfully erudite, written with elegance, and argued with both subtlety and vigor. (José C. Moya, Barnard College of Columbia University)

CULLING THE MASSES: THE DEMOCRATIC ORIGINS OF RACIST IMMIGRATION POLICY IN THE AMERICAS BY DAVID FITZGERALD, DAVID COOK-MARTÍN PDF

Culling the Masses questions the widely held view that in the long run democracy and racism cannot coexist. David Scott FitzGerald and David Cook-Martín show that democracies were the first countries in the Americas to select immigrants by race, and undemocratic states the first to outlaw discrimination. Through analysis of legal records from twenty-two countries between 1790 and 2010, the authors present a history of the rise and fall of racial selection in the Western Hemisphere.

The United States led the way in using legal means to exclude "inferior" ethnic groups. Starting in 1790, Congress began passing nationality and immigration laws that prevented Africans and Asians from becoming citizens, on the grounds that they were inherently incapable of self-government. Similar policies were soon adopted by the self-governing colonies and dominions of the British Empire, eventually spreading across Latin America as well.

Undemocratic regimes in Chile, Uruguay, Paraguay, and Cuba reversed their discriminatory laws in the 1930s and 1940s, decades ahead of the United States and Canada. The conventional claim that racism and democracy are antithetical?because democracy depends on ideals of equality and fairness, which are incompatible with the notion of racial inferiority?cannot explain why liberal democracies were leaders in promoting racist policies and laggards in eliminating them. Ultimately, the authors argue, the changed racial geopolitics of World War II and the Cold War was necessary to convince North American countries to reform their immigration and citizenship laws.

Ground-breaking contribution to comparative immigration scholarship

By Daniel Naujoks

“*Culling the Masses*” is a ground-breaking contribution to comparative immigration scholarship. It sheds light on what criteria were used to select immigrants in the entirety of the Americas, from Canada to Argentina, from the US to Cuba and other countries.

The often openly racist policies of exclusion and inclusion of certain immigrants are meticulously researched by the authors, as are the underlying assumptions and value judgments about certain groups, such as Asians, Roma, and others. Their analysis spans more than 200 years, revealing authentic documents from policy-making processes in a large number of countries that are the result of in-depth archival work by the authors.

Ultimately, the insights into processes of norm diffusion and the exploration on the impact of democratic and non-democratic political regimes make this book a must-read for scholars, students, and the interested public who want to learn more about how states learn to select immigrants and what are the limitations of the involved policy choices.

An indispensable read

By mls books

Culling the Masses is an indispensable read for anyone interested in the history and politics of racially exclusionary immigration policy in the Americas. This book is the first to provide a comprehensive analysis of the rise and fall of racial and national origin exclusions in immigration law across the Americas –covering no fewer than twenty-two countries over more than two centuries. The incredible breadth and depth of the analysis pays off in a big way. Fitzgerald and Cook-Martin break new ground by demonstrating the pivotal role of geopolitics and international organizations in shaping immigration policy in individual countries – including the United States. Their comparative analysis also raises troubling questions about the intimate historical link between democratic processes and racist social policies throughout the Americas.
