Good overview of the marshals during the pre-WWI era

By Nicholas Roberts

Dunn's book on Napoleon's marshals can be considered an early precursor of the version edited by Chandler in the 20th century. Written in the 19th century before the advent of mechanized warfare it gives the reader a good look at how the marshals performed through the eyes of near contemporaries. The book is divided into chapters with one marshal per chapter. Overall Dunn is sympathetic to the marshals, perhaps recognizing the inherent difficulties of warfare at that time. Many modern writers are rough on these talented commanders and put them down as incompetent. Dunn does not do so. He gives a good evaluation of their skills, their military career and their lives in general. Unlike Chandler's later book this is written by Dunn and therefore it is HIS opinion of the commanders. If you want different views of the marshals I would suggest Chandler as some are critical and others are praiseworthy. Comparing the evaluation of these two books would be highly recommended to see what the marshals' military thoughts were really like.
