This Purchase Should Be a No-Brainer

By Mark SanDiego

In the past, study guides I have had included much more emphasis on review and summary material. This book has none of that. This is strictly questions and answers. Questions come in the form of multiple choice, fill in the blank, essay, and crossword. Their are nice rationales and answers in the back. There are also a few short learning objectives I think in the front of each chapter.

Definitely a great source for reviewing material in a quick and interactive way. It really focuses you in on what topics are more important and why.
