Fabulous

By Yuzuky Ramirez

I've just recently bought all of the Jan Green Why Should I? series and they are great! The books are easy to read for the little ones, not too much text is good, it goes right to the point, and that makes it easy for the children to understand. The illustrations are wonderfully colorful and will catch the children's attention in a heartbeat. Not only are they cute books, but they send out a great message, children need to know how to protect our Earth from a really early age and Jan Green did a splendid job.22 of 23 people found the following review helpful.

Recycling is Great Fun

By Pamela J. Mikkleson

I taught a lesson using this book and it worked great. I got a lot of positive response from the children on recycling. We started a recycling center in our classroom and it is working great. I have received feedback from the parents as well that they have started their own recycling at home since we started this unit in our classroom. A lot of positive things have come from the use of this book with our unit.

Thanks

Pam Mikkleson

Great for Recycle knowledge for young children.

By Tina R. Durham-woehler

I read this book to a group of 3-5 year old children. They were able to follow the storyline and relate to things they could do to keep their environment clean. This falls right in line with any earth day activities or classroom emphasis you may be planning. See all 19 customer reviews...
